“Wall element or door element having castors

Patent Claims:”

and insert the following:

--CLAIMS

What is Claimed is:--

CLAIMS AMENDMENTS

1. (currently amended) Wall element or door element which can be moved by means of ~~{lower}~~ castors (12) on floor runners (13) which are designed as hollow bodies with a guide slot running in the longitudinal direction, ~~namely a guide slot (18),~~ with the castors (12) being mounted in each case on a castor carrier (21) and the wall element or door element being at least partially liftably and lowerably adjustable relative to the castors (12), ~~namely being liftable and lowerable, characterized by the following features wherein:~~
 - a) a securing member (28) ~~is arranged in the region of at least one of the~~ of the castors (12), the said securing member entering with anchoring members, ~~in particular securing hooks (31, 32),~~ into the runner (13) and securing the castor (12) against lifting off from the runner (13), and
 - b) the securing member (28) is mounted ~~(exclusively)~~ on an axis of rotation or castor axle (23) of the castor (12).

2. (currently amended) Wall element or door element according to Claim 1, ~~characterized in that~~ wherein the castor (12) is mounted rotatably on a central, fixed hub (25) and the securing member (28) is mounted on the hub.

3. (currently amended) Wall element or door element according to Claim 1 ~~or 2,~~ ~~characterized in that~~ wherein the securing member (28) has two supporting walls (30) which are formed at a distance from each other and are mounted on both sides of the castor (12) on the castor axle (23) or the hub (25).

4. (currently amended) Wall element or door element according to Claim 1 ~~or one of the further claims,~~ ~~characterized in that~~ wherein the anchoring members are anchoring hooks (31, 32) and the securing member (28) forms a lower web (29), with the securing hooks (31, 32) being fitted on both sides of the castor (12) to end regions of the web (29).

5. (currently amended) Wall element or door element according to Claim 1 ~~or one of the further claims, characterized in that~~ wherein the securing member (28) has a triangular design with an upper, central corner region being mounted on the castor axle (23) or on the hub (25).
6. (currently amended) Wall element or door element according to Claim 1 ~~or one of the further claims, characterized in that~~ wherein the castor (12) is mounted on a castor carrier (21) and the latter is connected movably, ~~in particular pivotably,~~ to a frame (10), the castor carrier (21) having two supporting limbs (22) arranged at a distance from each other, and the castor axle (23) extending between the supporting limbs (22) in such a manner that the castor (12) is mounted between the supporting limbs (22).
7. (currently amended) Wall element or door element according to Claim 6 ~~or one of the further claims, characterized in that~~ wherein the securing member (28), ~~in particular the two webs (29) arranged at a distance from each other,~~ is/are mounted between the supporting limbs (22) of the castor carrier (21).
8. (currently amended) Wall element or door element according to Claim 1 ~~or one of the further claims, characterized in that~~ wherein the castors (12) have a central guide rim (19) running all the way around for entering them into a guide slot (18) of the runner (13) and supporting surfaces (20) resting on the runner (13) on both sides of the guide rim (19), the supporting surfaces (20) having an outwardly directed, sloping inclination of (approximately) 5°.
9. (new) Wall element or door element according to Claim 1, wherein the anchoring members are securing hooks (31, 32).
10. (new) Wall element or door element according to Claim 6, wherein the castor carrier (21) is connected pivotably to the frame (10).

11. (new) Wall element or door element according to Claim 7, wherein the securing member (28) are two webs (29) arranged at a distance from each other.
